PROJECT WORK

2018-2019
VITA INVENTOR
Vita Inventor is web application where people can build or design their Curriculum Vitae. It is basically help to student or job seeker who are fresher's level. With the help of this web application user can create attractive and good CV. There are some good features provided in this web application like save bio data, cv divide in to section like education details, personal details, co-curricular activities and user can also save ata into section so whenever user need to change resume format or design no need to write information againand again user choose section and data will be automatically set in resume.

2017-2018
ONLINE JOB PORTAL
This website is for job seeker who have only degree of engineers. They select company from list as per their education qualification and area of interest and send their application to company. Company will shortlist the employee and arrange online exam and employee will give online exams.

2015-2016
Construction
This website is related to online construction who want to buy any property and also provide google map so user can see their current work.
